

HR Executive Dashboard

SaaS HR Analytics

Executive Summary

This Power BI dashboard was designed to help HR leaders monitor workforce health, employee retention, employee satisfaction, and key HR performance indicators. The dashboard transforms raw employee data into actionable insights that support strategic workforce decisions.

Business Problem:

Limited visibility into workforce trends
Difficulty identifying attrition drivers
Manual HR reporting
Lack of centralized executive KPIs

Project Goal

- Monitor workforce KPIs
- Reduce employee attrition
- Improve HR decision-making
- Identify retention risks

Key Business Questions

1. What is the current workforce overview?
How many employees does the company have and what are their key demographic characteristics?
2. What is the employee attrition rate?
How many employees have left the company and how significant is employee turnover?
3. Which departments and job roles experience the highest attrition?
Where should HR focus its retention efforts?
4. Does overtime contribute to employee attrition?
Are employees working overtime more likely to leave the company?
5. How satisfied are employees with their work environment?
What are the current levels of job satisfaction, work-life balance, environment satisfaction, and relationship satisfaction?
6. Do compensation and experience influence employee retention?
Is there a relationship between salary, years of experience, and employee attrition?
7. Which employee groups are at the highest risk of attrition?
Can HR identify workforce segments that require proactive retention strategies?
